

# **ASSIGNMENT 3, TFY4240 ELECTROMAGNETIC THEORY MIDTERM PROJECT, SPRING 2017**

INGVE SIMONSEN

Since the assignment will not be graded, you will also have the possibility to define your own problems. They should be taken from the theory part of the class.

In order to make sure that the problems you choose are advanced enough (read “not trivial”), or not too complicated and/or time-consuming to solve, you will have to get pre-approval from the lecturer or a teaching assistant.
